

Your Maruti vehicle's body is Built Rugged, but under continuous attack by elements such as unnoticed rain water, water which enters through doors and or glass channels during washing and gets deposited inside the doors, mudguard and running board etc.

Car under body anti-rust coating is formulated to provide long term protection to metal surfaces exposed to corrosive environment(s). It provides corrosion control to your car's under body structure. It is also effective on all metals in a humid/non-salty atmosphere(s), thus providing complete corrosion protection for years.

FEATURES:

- Protects corrosion through water & road salt.
- Excellent abrasion resistance.
- Multi metal protection.
- Good sound deadner.
